

**Goal:** I will be able to \_\_\_\_\_

### Tool Bag

Formulas,  
equations,  
vocabulary, etc.

### Similar Figures

~

#### Example 1

$\triangle ABC \sim \triangle NOP$ . Describe a series of rigid motion followed by a dilation that shows the two triangles are similar.

#### Example 2

$ABCD$  and  $EFGH$  are rectangles. Given  $ABCD \sim EFGH$ , describe a sequence of a rigid motion followed by a dilation with center  $(0,0)$  that maps  $ABCD$  to  $EFGH$ .

Effects of Dilations On:  
Angles

Length of Sides

#### Example 3

Is  $\triangle MNO \sim \triangle PQO$ ? Why?

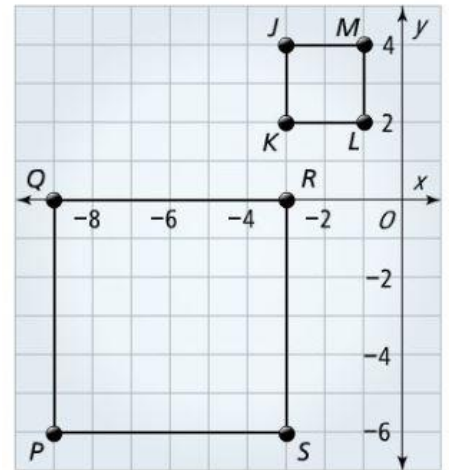

**You Try**

Given  $\triangle ABC \sim \triangle DEF$ , describe a sequence of rigid motion followed by a dilation with center  $(0,0)$  that maps  $\triangle ABC$  to  $\triangle DEF$ ?

JKLM and PQRS are squares. Given  $JKLM \sim PQRS$ , describe a sequence of rigid motion followed by a dilation with center  $(0,0)$  that maps JKLM to PQRS.

Which two triangles are similar?
